101

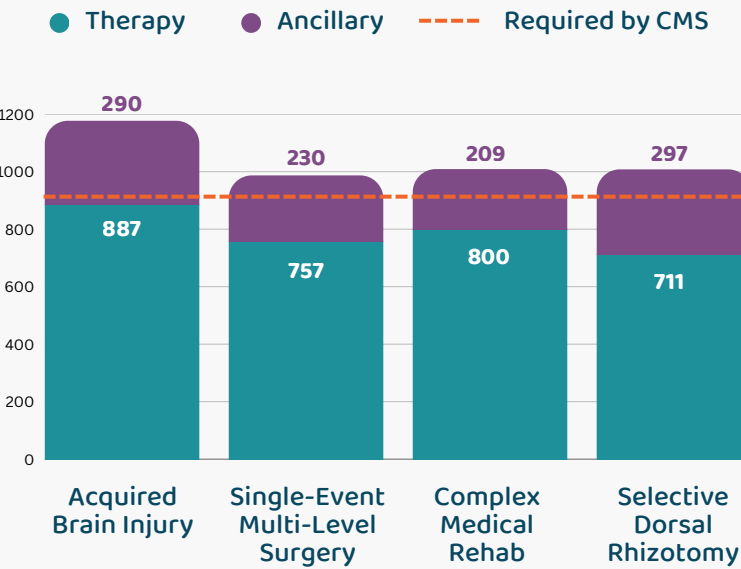

Age	% Served
0 to 3	12%
3+ to 5	8%
5+ to 7	15%
7+ to 10	17%
10+ to 13	18%
13+ to 16	18%
16+	13%

OUTCOMES Our Patient Functional Ability at Admit and Discharge (Average)

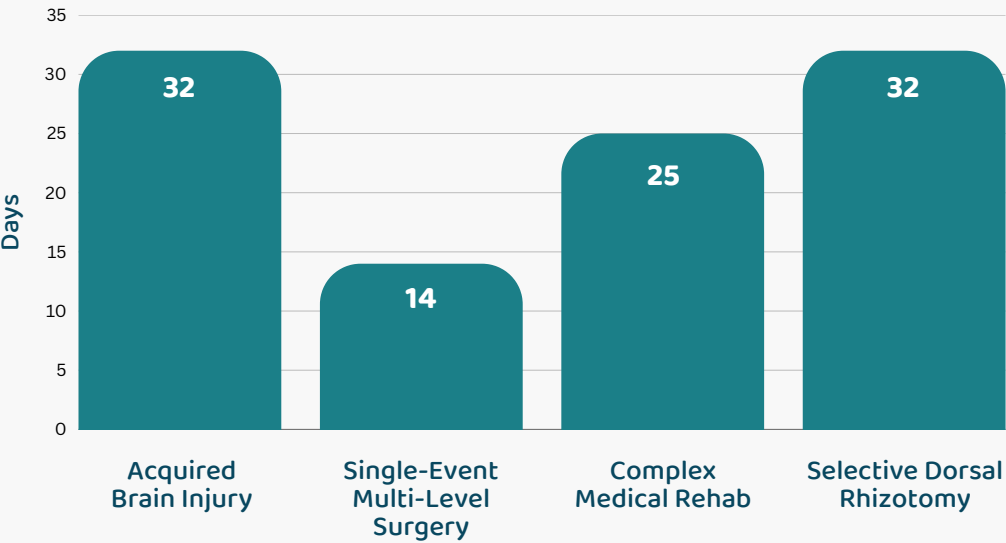

Children admitted into Gillette's pediatric acute rehab program demonstrated progress based on the WeeFIM assessment. Activities such as walking, taking care of themselves, communicating and thinking skills are rated. Patients are assessed at time of admission and again at discharge to determine WeeFIM scores.

THERAPEUTIC CARE Average Weekly Minutes of Therapy

EFFICIENCY Average Length of Stay (Days)

3.87 on a 4 point scale (96.8%)

Patient Satisfaction

MedTel Patient and Family Satisfaction Score

98.4%

Discharge to Home

98.4% of children were discharged to a home setting, exceeding other hospitals in the nation.
